Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to amendment filed on May 27, 2005.
2. Claims 1-5 and 11-12 have been canceled.
3. The first page of the specification must be updated to include 08/543,786 now abandoned.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bantz et al. (5,123,029).

Regarding claim 6, Bantz discloses a computer system comprising:

a local area network (LAN) having one or more servers connected thereto (see fig.1, 18, and its description);

an access point connected to said LAN, said access point including means for enabling interfacing of said LAN with a plurality remote interface devices by way of a radio link (see fig.1, elements 10, 12, 14, 16, 26, 28, and its description); and

a plurality of wireless interface devices, each of said wireless interface devices including means for communicating with said access point by way of a radio link (see fig.1A, elements 10, 12, 14, 16, 26, 28, and its description).

Regarding claim 7, Bantz further discloses LAN is a wired LAN (see fig.1A, element 32 and its description).

Regarding claims 8-9, Bantz further discloses LAN is a wireless LAN (see fig.1A, elements 30, 34 and its description).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bantz et al. (5,123,029) in view of Sheu (5,781,715).

Regarding claim 10, Bantz discloses all the subject matters described in rejected claim 6, except for . However, Sheu discloses a fault-tolerant bridge/router with distributed switch-over mechanism comprising: a second LAN and a router said router, connecting said LAN and said second LAN (see fig.1, elements LAN 1-4, 20 and its description). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the Sheu's the multiple LAN networks in Bantz's invention in order to improve the use of multiple LAN networks.
